AirTamer®

Breathe cleaner, healthier air - everywhere you go!

Presented by: Troy Anderson, President

August, 2021

Living Life Healthier!

Keeping air healthier as we live our lives has never been more challenging!

viruses

bacteria

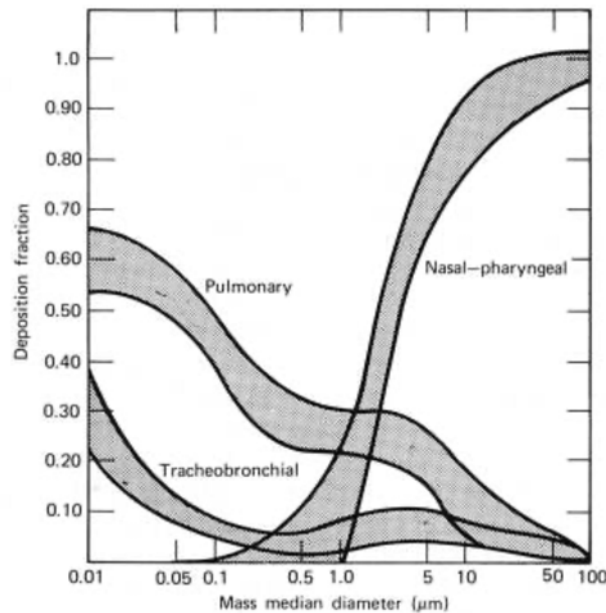

smoke,
allergens,
pollution

Small Particles Create the Biggest Problems!

The smallest airborne particles tend to do the most damage to our health because they can more easily reach our lungs.

FACT

97% of air particles are smaller than 0.3 microns

“Ultra fine particles smaller than 0.1 micron can penetrate deeper into the respiratory system, and due to their high diffusion coefficients, they have furthermore a higher probability to deposit there than larger particles. There are indications that the smaller the particle fraction, the larger the health impact”

Source: Centre for Transport Research on Environmental and Health Impacts and Policy, Copenhagen, Denmark

“Over 50% of the number of particles between 0.01 and 0.1 microns that penetrate into the pulmonary will be deposited. This ability of particulates to penetrate into the respiratory system and be captured is principally a function of their size and is almost completely independent of the chemical properties of the particle.”

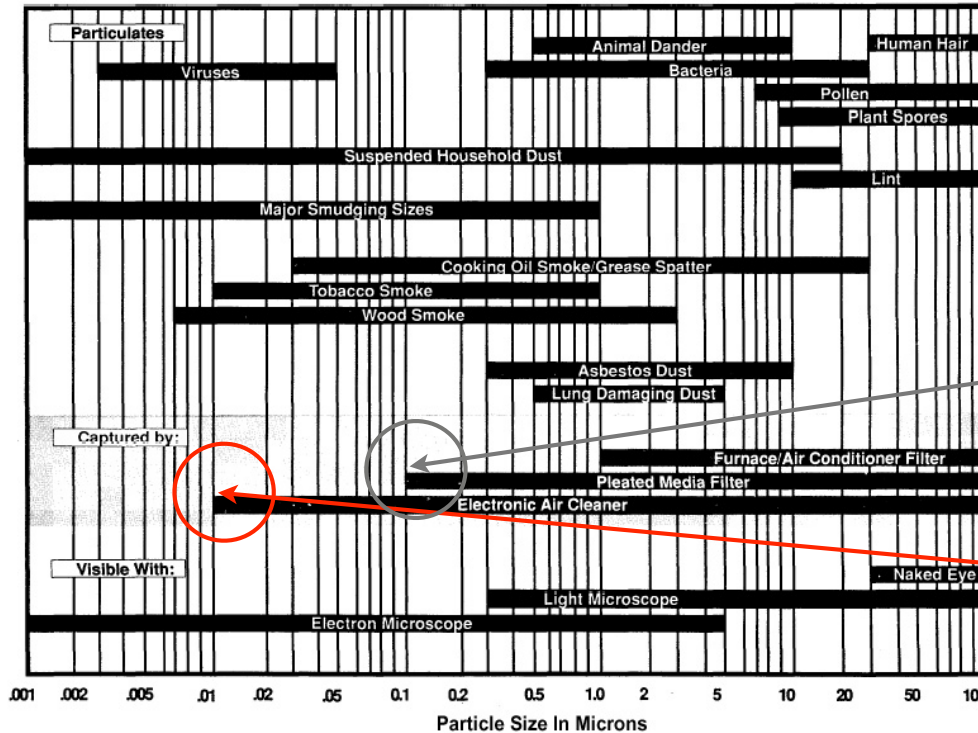

Source: Marshall Sittig, *Particles and Fine Dust Removal*, pg.16

Superiority of AirTamer[®] Ionic Cleaning

AirTamer reduces airborne air pollutants, viruses and allergens from your breathing space better than competitive air purifier technologies.

FACT
 HEPA = 99.97% of particles larger than 0.3 microns are captured
 Typical Virus Size = 0.08 - 0.2 microns
 Typical Smoke Particle Size = 0.01 - 4.0 microns

HEPA filter particle limit

Ionic air purifiers filter out atomic sized particles that traditional air purifiers leave behind!

How AirTamer® Works

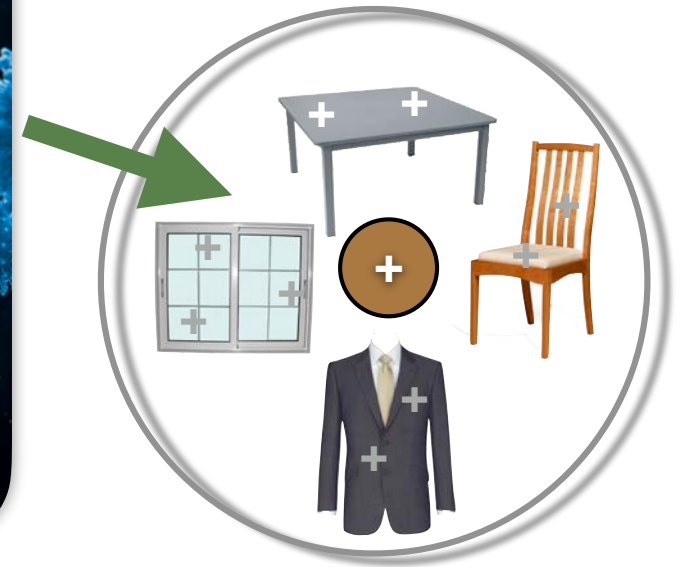

1 Millions of negative ions emitted from AirTamer's black brush

2 Negative ions attach to air particles and apply a negative charge

3 Negatively charged particles are naturally attracted to positively charged surfaces rather than entering your breathing passage

Pollutants land on surrounding positively charged objects, not in your lungs

FACT

A negative ion is formed by the addition of negatively charged electrons. Waterfalls and ocean surf are two of the best natural sources of negative ions.

Laboratory Certified Performance

Virus Testing

AirTamer eliminates **99%** of viruses in **20 Minutes**

* Virus reduction testing by Kitasato Research Center using Escherichia coli phage MS2 NBRC 102619 and influenza A viruses

Smoke Testing

AirTamer eliminates **98.9%** of smoke in **5 Minutes**

* Source: Independent testing by Intertek

The only brand
ETL, CARB & EPA certified!

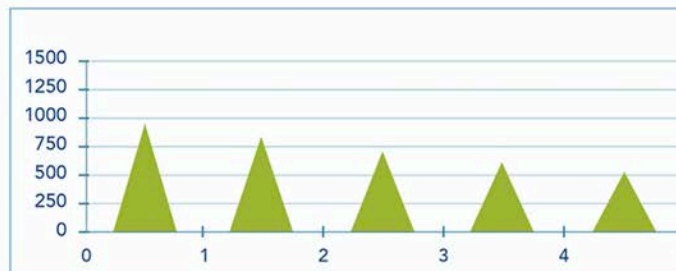

Also tested on the
common flu!

VOC Testing

AirTamer reduces VOC levels by **52%** in **5 Minutes**

* Source: Independent testing by Yukio Sato

AirTamer[®]

What Makes AirTamer® Unique & Superior?

1. Most trusted - best performing, best selling personal air purifier in the world.
2. Patented conductive lanyard technology uses the human body as a counter electrode (i.e. ground). This results in higher ion output and dramatically lower energy consumption.
 - Out cleans all other wearable competitors.
 - Exhibits up to 12X the run time of competitive units.
3. Emits healthy negative ions without ozone.
4. Lab certified to clean away viruses and smoke. ETL, CARB & EPA certified!
5. The only personal air purifier with replaceable lanyards and emitters.
6. Attractive, discreet & versatile designs.

Customers love their AirTamer!

I love, love, love my AirTamer 302! I have MS and the last two months of continuous pollen allergies left me with no voice or energy and really took a toll on my immune system.

I was constantly sneezing, coughing, had itchy eyes and throat and was just miserable. I am on prescription allergy medicine for seasonal asthma and also itchy eyes.

I could not go outside or even open the door without having an attack soon afterward. I saw an ad for the Air Tamer and read the reviews and thought what was the worst that could happen – nothing, I had everything to gain.

Less than an hour after hanging it around my neck, my breathing got easier and I felt like I could breathe down to my toes. I wear it every day. I have to be especially careful around people with colds or the flu, so my hope is that it can keep me safe this winter.

So far, I am extremely and happily impressed with this product. Yea AirTamer!
– **Kitty W. Tucson, AZ**

"I have cystic fibrosis and use the AirTamer on the plane and in public places and it is great! Last month my finance and I were sitting next to each other on a plane. I was wearing the AirTamer and she was not. She caught a cold and I did not!"
– **M Howard, Woodridge, VA**

"I suffer from Restrictive Airway Disease. My condition gets triggered when I am exposed to synthetic fragrances. Aside from avoidance or wearing a mask, there wasn't much I could do about exposure, until I started using the A302. Thank you for giving me my freedom back!"
– **BN, Ottawa, ON, Canada**

I am a UK customer and we have two of the small personal ionizers which your company is selling... though ours are the A300 models. My husband has leukemia, and must not catch any colds, germs, viruses, etc. otherwise he lands in hospital with lung infections. This ionizer which you are selling has been marvelous for him. Before he started to wear it, he was hospitalized twice with pneumonia, and was always catching colds, because of his compromised immune system. Since he's been wearing this ionizer every time he goes out, or people come here, he hasn't been admitted to hospital once. It is such a blessing.

RE: Introduction and Thank you!

Dear Mr. Anderson:

My name is Laurie Chandler and I'm reaching out to you with regard to the positive experience I have had with your product. I received a life-saving double lung transplant in 2014 due to genetic condition which resulted in pulmonary fibrosis, a progressive, deadly disease that causes scarring of the lungs.

After my transplant, I had to become more conscious of my health and reducing my exposure to airborne particles. The AirTamer was first introduced to me in 2017; after which I immediately purchased one. I have been a thoroughly satisfied customer and frequently recommended it to others. I travel regularly, and the device helps me to breathe easier on planes and in other large crowded areas. It has allowed me the freedom to continue living my life to the fullest and removed some of the worry associated with protecting my new lungs.

Please know what a difference you've made in my life and I'm certain you could make the same impact for others living with pulmonary fibrosis. As a member of the Board of Directors for the Pulmonary Fibrosis Foundation, I'd like to help you achieve that goal and invite you to learn more about the Foundation. Would you be open to a conversation in regards to engaging with the Foundation? Please let me know.

In the meantime, here is the link to the Foundations website:
www.pulmonaryfibrosis.org

Thank you for your time and I look forward to hearing from you. Feel free to contact me by email (lchandler@lchandler.us) or by phone (cell: (603)770-1123).

My best regards,

Laurie L. Chandler
